

Häni Technology: However you turn it.

Precision, quality and efficiency -
from the idea to series production

Häni + Co. AG
August 2026

Experience

Third-generation **family business** specialising in complex precision-turned parts and complementary manufacturing processes.

80+ years

Machinery

- 81 turning machines** for precision turning $\varnothing$ 1–65 mm
- single-spindle conventional & CNC
 - multi-spindle
 - rotary transfer machines

- 35 machines** for additional manufacturing processes:
- centerless grinding
 - honing
 - vibratory finishing
 - roller burnishing
 - gear hobbing up to module 2 / $\varnothing$ 60mm

81 + 35

Production Area

3150 m²

Employees

67

Certifications

IATF 16949
ISO 13485
ISO 14001
ISO 9001

Sustainability

350'000 kWh solar
power per year

Industries

Medium and high-volume production for

- Building & Automation
- Mobility
- Medical & Laboratory
- Electronics & Connectors
- Robotics & Sensors
- Renewable Energy

Focus

High surface quality

Grinding · Vibratory finishing
· Roller burnishing

Precision bores

Honing

Gear hobbing

up to module 2

Häni Technology: complex precision-turned parts for medium- and high-volume production

Are you developing a new component or looking for a reliable manufacturing partner for demanding precision parts?
